Why use MASTCLIMBERS™?

Brand Access Solutions Mast Climbing Work Platforms (Mastclimbers™) are an innovative and efficient piece of construction equipment used to provide safe work at height access.

BrandSafway Endorsed

Brand Access Solutions scaffolding, hoists and Mastclimbers™ vertical access solutions in the UK are backed by the might of one of the world's leading global access providers, BrandSafway.

Our services are interchangeable – offering what we call 'hybrid access solutions' for our clients, making us a desirable one-stop-shop for vertical access and scaffolding solutions, all with in-house engineering design.

Transforming Construction with Sustainable Access

As part of our hybrid access offerings, Mastclimbers™ by Brand Access Solutions, offer a faster, more sustainable alternative to traditional scaffolding. Designed for efficiency, these turnkey systems transport personnel, tools, and materials quickly and safely to the optimal work level while minimizing obstructions and keeping building facades clear.

With fewer components, reduced labor, and lower transport requirements, Mastclimbers™ provide an eco-friendly access solution ideal for contractors focused on sustainability and net-zero goals. Their high load capacity and adjustable platform levels eliminate the need for hop-ups, ensuring safe, flexible positioning at varying heights.

Our Mastclimbers™ use less energy than other types of construction equipment, and produce less noise and air pollution, making them the ideal choice for construction projects in urban or environmentally sensitive locations

Easy to assemble from standard deck and mast modules, Mastclimbers™ accommodate straight, profiled, and curved structures while reducing manual handling strain. Their spacious, stable, and fully encapsulated platforms also minimize the risk of dropped materials. Even where highrise access is required

Ideal for high-rise projects such as re-cladding, as well as medium and low-rise applications, Mastclimbers™ significantly boost productivity. For example, a 40m scaffold installation might require eight operatives, four wagons, and several weeks, whereas Mastclimbers™ need just two operatives, one wagon, and three days.

We provide comprehensive training—including demonstrator, user, installer, and advanced installer modules. Supported by our in-house design and engineering team.

Nationwide Access Solutions

With all of our branches across the UK stocked with Mast Climbers, we deliver nationwide service and supply of our motorized access solutions, supporting all construction sectors—from façades and bridges to dams and high-rise buildings—all while meeting British Standards.

Our expert team works closely with clients to deliver tailored solutions, ensuring the right configurations and capacities for each project. Whether lifting cladding panels with a mast-mounted winch or navigating building corners with custom returns, we offer flexible and efficient access solutions.

Mastclimbers™ are designed for versatility, operating seamlessly on uneven terrain and in challenging environments. Their advanced safety features, including guardrails, safety locks, and emergency stop buttons, provide a secure, stable, and spacious working platform, reducing the risk of accidents on-site.

Safety, efficiency, and nationwide availability—Mastclimbers™ are the ideal access solution for modern construction.

Multiple Designs

Our modular design provides a huge variety of configurations for our clients – allowing working crews to be positioned with their tools and materials at the optimum access point for the required working surface.

- Single or double mast platforms up to 30m long.
- Platform extensions up to 3m to accommodate irregular elevation profiles/corner sections.
- Corner platforms and extension accessories.
- Up to three platforms on the same masts.

And all mechanical access is backed up by the Brand Access Solutions SHEQ safety and in-house design and engineering departments.

Commitment to Safety & Compliance

At Brand Access Solutions, we take safety and compliance seriously. Our fleet includes fully British Standards-compliant Alimak MC450, Alimak MCM, SAE P40, and RESA 15.36 machines, supplied directly from manufacturers in strict accordance with EN 1495 requirements.

We adhere to the latest Health and Safety Executive (HSE) bulletins, conducting weekly inspections, periodic servicing, and six-monthly thorough examinations—carried out by certified, trained and competent examiners. These inspections, including proof load tests, ensure optimal safety and performance.

From the quality of fleet preparation by our in-house engineers and workshop team to the quick and safe installation by our IPAF-trained, fully qualified field operations team, and the meticulous service, inspections, and examinations performed by our experienced field teams—no stone is left unturned. This rigorous approach ensures that Mastclimbers™ from Brand Access Solutions remain among the best in the industry.

Our award-winning SHEQ (Safety, Health, Environment & Quality) team at Brand Access Solutions oversee every aspect of this process, reinforcing our commitment to world-class safety standards.

A Culture of Safety

At Brand Access Solutions, safety isn't just a priority, it's our foundation. Our SHEQ Director emphasises:

"Safety is paramount across all our working-at-height services. Our 'Five Pillars of Safety': Employee Intervention, Supervisor Observation, Management Safety Reviews, the GoldLink Audit System, and the Learning Network—guide everything we do."

From leadership to every team member, safety is embedded in our culture. We empower employees to take ownership and personal responsibility, ensuring everyone feels confident stopping any task if safety is at risk.

By partnering with Brand Access Solutions, you gain safe and efficient vertical access solutions, including Mastclimbers™, scaffolding, hoists, and engineering-backed hybrid access systems, designed for reliability and seamless integration into your project.
